1. What is borderline product Cannabis suppositories 50 mg CBD suppositories and what is used for

Cannabis suppositories 50 mg CBD contain CBD hemp oil that is oil extract from annual grassy plant cannabis or hemp plant. The oily extract is with proven absence of pesticides and herbicides in the product. The extraction is carried out at low temperature without the use of organic solvents which provides the highest quality of the oil extract.

CBD hemp oil contains cannabinoids, primarily CBD (Cannabidiol), CBN (Cannabinol), CBG (Cannabigerol) and their carboxyl compounds. Cannabinoids bind to the CB1 and CB2 receptors of the endocannabinoid system causing immunomodulating effect (improving the immune system).

CBD hemp oil may contain terpenes, omega fatty acids (omega-3, omega-6, omega-9), flavonoids, phytosterols, amino acids, glycosides, vitamins (A, B1, B2, B6, C, D, E, F), pigments, alkanes, nitrogen compounds that are important in the construction of cells, metabolic processes, maintaining the function of many systems and complete improvement of the general health condition.

CBD hemp oil contains THC (9-delta tetrahydrocannabinol) in amount less than 0,2%.

CBD hemp oil can help the body in conditions with malignant diseases, multiplex sclerosis and HIV.

CBD hemp oil is not a substitute for standard prescribed therapy and especially it is not a substitute for standard therapy of abovementioned diseases.

The positive effects from taking Cannabis suppositories 50 mg CBD are manifested in:

- Conditions of stress, anxiety, nervousness, depression, muscle spasms;
- It is used for nausea and vomiting, especially during chemo or radiation therapy in malignant diseases;
- Helps maintaining the balance of intestinal flora;
- Relieves pain conditions of various origins, due to its anti-inflammatory action.

It can be used for prevention of cardiovascular diseases: helps in regulation of blood pressure, improves heart function, has cardioprotective effect, can help in regulation of elevated concentrations of lipids and cholesterol levels in the blood and can help in regulation of elevated concentration of blood glucose.

Cannabis suppositories 50 mg CBD are recommended for individuals with swallowing difficulties or intolerance to Cannabis hemp oil taste (flavour).
