- 2. What you need to know before taking borderline product Cannabis ointment with natural hemp extract with Vitamin E*
- 3. How to take borderline product Cannabis ointment with natural hemp extract with Vitamin E*
- 4. Possible side effects*
- 5. Storage and shelf life of borderline product Cannabis ointment with natural hemp extract with Vitamin E*
- 6. More information*

#### **1. What is borderline product Cannabis ointment with natural hemp extract with Vitamin E and what is used for**

Cannabis ointment with natural hemp extract with Vitamin E contains oil extract from cannabis or hemp plant obtained with extraction carried out at low temperature without using of organic solvents, with proven absence of pesticides and herbicides.

The hemp oil extract contains cannabinoids and may contain terpenes, omega fatty acids (omega-3, omega-6, omega-9), flavonoids, phytosterols, pigments, amino acids and vitamins (A, B1, B2, B6, C, D).

The hemp oil extract contains THC (9-delta tetrahydrocannabinol) in amount less than 0,2%. Cannabinoids, especially CBD (Cannabidiol), bind to the receptors from the endocannabinoid system in the skin especially to the adequate cell receptors from the surface layer of the skin (epidermis), the cells of the sebaceous glands and nerve endings in the skin, thus achieving their anti-inflammatory and soothing effect.

Cannabidiol in Cannabis ointment with natural hemp extract with Vitamin E based on several conducted studies may:

- have local anti-inflammatory effect,
- reduce the pain and itching ,
- affect secretion of the sebum from the sebaceous glands (especially in skin with increased secretion of the sebaceous glands associated with age and hormonal status),
- reduce the excessive cell growth (hyperkeratosis).

Cannabis ointment with natural hemp extract with Vitamin E contains vitamin E that has beneficial effect over epithelialization, regeneration and maintenance of the skin tonus.
